

# TIOPS enters into a cooperation with **FACAD**

TIOPS are proud to announce that TIOPS has entered into a cooperation with the Swedish orthodontic tracing software Facad.

Jens Bjoern-Joergensen, CEO for TIOPS Denmark has become an external partner to the development team at Ilexis AB, producer of the orthodontic tracing software Facad. The plan with this cooperation is to include parts of TIOPS' powerful and unique functions into the Facad program for near future releases.

TIOPS has ceased to develop the TIOPS software any further. The final update of the Tiops4 program will be available at [www.tiops.com](http://www.tiops.com) until further notice.

We recommend TIOPS users to consider Facad as a replacement or a supplementary software for TIOPS, read more at [www.facad.com](http://www.facad.com)
